DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Batchelder, US Patent 5,472,502.

Batchelder teaches the claimed invention in figures 11A and 11B, and column 9 line 17 through column 10 line 35.

3. Claims 26-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mandal et al, US Patent 5,670,210.

Mandal et al teaches the claimed invention in figures 1 and 2, and throughout the specification.

4. The examiner notes that the specific substance supplied to an apparatus, and the specific substrate processed in an apparatus is an intended use of the apparatus. Both Batchelder and Mandal et al are inherently capable of delivering any substance (solvent or catalyst) to the showerhead, which evenly distributes the substance over the substrate. Likewise, both apparatus can be used to process substrates for an integrated circuit or a chemical sensor (or any other device).
